## Public Website

Does your company maintain a public website describing all hearing aid-compatible models, the ratings of those models, and an explanation of the rating system? Service provider websites must include the levels of functionality that the service provider has defined, the level that each hearing aid-compatible model falls under, and an explanation of how the functionality of the handsets varies at the different levels.

Explain:

## Consumer Outreach

Describe consumer outreach efforts in the past 12 months: Cellular One compliant handset models are publicly identified for consumers and audiologists. Compliant models are listed on Cellular One's web site. Cellular One trains its sales people on which digital phones are compliant. Compliant HAC phones are identified at the point of sale in retail locations on merchandising call out cards. Consumers are given a 30 day trial period within which to try digital wireless phones to determine whether they will work properly with their hearing aids. Flexible return policies are made known to consumers seeking to obtain compliant phones.

## Methodology for Functionality Levels

High, Ultra High, and Extreme Tier Handsets - range from \$250.99 - and up) may have advanced features such as a 2MP or above camera, advanced Bluetooth, expandable memory, email access, touch screen and internet access capability.

Mid and Mid High Tier Handsets (\$170.99 - \$249.99) may have a medium-resolution camera, advance Bluetooth, and Internet access capability, but lack e-mail access.

Ultra Low and Low Tier Handsets (less than \$170.99) generally have a low resolution camera, low resolution

displays and may not have Bluetooth, they also generally lack such features as MP3 players, e-mail and expandable memory.
